

PROCESS PARAMETER SCANNER

for Photoshop by RONC © 2018
Version 1 24Jun2018 (E-MAIL)

PHOTOSHOP SCRIPTS by RONC

PROCESS_PARAMETER_SCANNER - This Photoshop Script allows the user to run of a series of scans with changing parameters for the following PROCESSES:

- Gaussian Blur - Radius > P1(S1-SN)M1,
- HighPass - Radius > P1(S1-SN)M1,
- Median - Radius > P1(S1-SN)M1,
- Unsharp Mask - Radius > P1(S1-SN)M1, Percent > P2(S1-SN)M2, Threshold > P3(S1-SN)M3,
- Gamma/Exposure - Gamma > P1(S1-SN)M1, Exposure > P2(S1-SN)M2, Offset > P3(S1-SN)M3.

where: P1, P2, P3, P4, and P5 are Parameters required by the PROCESS, S1 and SN are the first and last users definition of the Parameters and M1, M2, M3, M4, and M5 are modifiers telling the shape of the interpolation, LINEAR or POWER, between S1 and SN for the scans. LINEAR interpolation is the default. M = 0 or 1 is Linear and other positive values represent powers. This document and the script do not know anything about the Parameters so limited checking for validity is performed. Please review the usage of the parameters in the PROCESS documentation.

INPUT IMAGE

Input can be 8, 16, or 32 bits per color channel with the output being the same. Color type (RGB) is not changed either.

USAGE PARAMETERS

ITEM	FUNCTION	User INPUT	INPUT Size (px)	OUTPUT Size(px)	EXT.
Process Parameter Scanner	Allows the user to run of a series of scans with changing parameters for various processes.	PROCESS_PARAMETER_SCANNER.pdf	Width X height.	Width X height.	jsxbin

PROCESS: GAUSSIAN BLUR - Radius>P1(S1-SN)M1

Number of SCANS: 1

PARAMETER/SCAN	SCAN 1	SCAN N	MODIFIER
PARAMETER 1	0	0	0
PARAMETER 2	0	0	0
PARAMETER 3	0	0	0
PARAMETER 4	0	0	0
PARAMETER 5	0	0	0

OK

Cancel

Help

(The ESC key cancels execution of the script while running in Photoshop.)

Number of SCANS

The number of times N that the PROCESS is executed. Each execution uses a modified M interpolation of parameters between Scans 1 and N. Linear interpolation is the default.

PARAMETER-1	SCAN 1	SCAN N	MODIFIER
	<ul style="list-style-type: none">Gaussian Blur - Radius,HighPass - Radius,Median - Radius,Unsharp Mask - Radius,Gamma/Exposure - Gamma.	<ul style="list-style-type: none">Gaussian Blur - Radius,HighPass - Radius,Median - Radius,Unsharp Mask - Radius,Gamma/Exposure - Gamma.	<ul style="list-style-type: none">Gaussian Blur - Radius,HighPass - Radius,Median - Radius,Unsharp Mask - Radius,Gamma/Exposure - Gamma.
PARAMETER-2	SCAN 1	SCAN N	MODIFIER
	<ul style="list-style-type: none">Unsharp Mask - PercentGamma/Exposure - Exposure.	<ul style="list-style-type: none">Unsharp Mask - PercentGamma/Exposure - Exposure.	<ul style="list-style-type: none">Unsharp Mask - PercentGamma/Exposure - Exposure.
PARAMETER-3	SCAN 1	SCAN N	MODIFIER
	<ul style="list-style-type: none">Unsharp Mask - ThresholdGamma/Exposure - Offset.	<ul style="list-style-type: none">Unsharp Mask - ThresholdGamma/Exposure - Offset.	<ul style="list-style-type: none">Unsharp Mask - ThresholdGamma/Exposure - Offset.
PARAMETER-4	SCAN 1	SCAN N	MODIFIER
PARAMETER-5	SCAN 1	SCAN N	MODIFIER

PROCESS

- Gaussian Blur,
- HighPass,
- Median,
- Unsharp Mask,
- Gamma/Exposure.

More PROCESSES may be added at a later time.
ACR - Saturation, Vibrance, Clarity,
PS - Displace, Color Mixer, and Offset have been suggested.

OK/CANCEL/HELP

OK - Start script execution using parameters set in the above fields.
CANCEL - Cancel the use of the script before running and return to Photoshop. The ESC key cancels execution of the script while running in Photoshop.
HELP - Open the PDF help file.

RECOMMENDED SCRIPT USAGE

Typical usage is GAUSSIAN BLUR with number of SCANS = 5, Radius at P1S1 = 0.5, and at P1SN = 5.0.

OUTPUT IMAGES

The Layer name (PROCESS 00N_a.b/c/e.f/g/i.j) is the PROCESS name, followed by a leading zero filled counter from 1 to the number of scans, followed by and underscore "_", and then followed by the local values P1 (a.b), P2 (c), P3 (e.f), P4 (g), and P5 (i.j) separated by "/" which were used by the PROCESS.

Example: GAUSSIAN BLUR 3_2.75 for less than 10 scans(layers) and 03_2.75 for 10 or more scans.

SAVE TO FILE

If saving to a file, it is highly recommended that the file format does not use lossy compression. PSD/PSB or TIF formats are probably the best with PNG24 next.

INSTALLATION/REMOVAL

This script should work on Photoshop versions CS6 and CC onwards and for both Windows and MAC. Might also work with Photoshop Elements. Someone should try it. Please.

The Script filename is PROCESS_PARAMETER_SCANNER.jsxbin and will be loaded to a folder with mostly *.jsx files. The Help filename is PROCESS_PARAMETER_SCANNER-HELP.pdf and should be placed in the same folder as the Script file.

MAC OS X foldername: PSCC 2018: Users/[username]/Library/Preferences/Adobe Photoshop CC 2018 Settings
WINDOWS 10 foldername: PSCC 2018: C:\Program Files\Adobe\Adobe Photoshop CC 2018\Presets\Script
